

Tone Up Your Taylor With Factory Service Packages

Here at the Taylor factory, our seasoned repair technicians have serviced thousands of guitars and know exactly how to restore guitars to tip-top shape. In response to owner inquiries, we've put together four service packages that cover any level of maintenance a guitar might need. Send your guitar(s) to the Taylor factory specifically for one of these packages, or add a service package to a guitar that's sent in for other reasons, such as warranty service, ding repair, etc.

Guitars shipped to us will be returned in a brand new shipping carton with Taylor-engineered inserts designed to stabilize the case and cushion the ends.

Refresh PACKAGE

Includes:

- > Stabilizing the guitar at the proper humidity level
- > Tuner tightening and adjustment
- > Fretboard cleaning and conditioning
- > Installation of new Elixir strings
- > Installation of new battery
- > Truss rod adjustment
- > Cleaning and polishing

\$95

Available for all Taylor guitar models

Revive PACKAGE

Includes the Refresh package plus:

- > Neck angle adjustment (reset)
- > Fret dress
- > Tusq nut and saddle adjustment or replacement as needed

\$200 | Acoustic models
SolidBody models (bone nut and bridge adjustment)

\$300 | T5 models (bone nut and saddle)

Available for all Taylor guitar models

Renew PACKAGE

Geared toward the gigging player, Taylor's repair techs will return your guitar to perfect performance condition. **Service includes:**

- > Revive package
- > Partial refret* (up to 10 frets)
- > Full check of the electronics system

\$325 | Acoustic models
SolidBody models (bone nut and bridge adjustment)

\$425 | T5 models (bone nut and saddle)

*Full refret add \$100

Available for all Taylor guitar models

Rejuvenate PACKAGE

The ultimate hydrating solution for a dry guitar. Your guitar and case are returned to optimum humidity levels with our rehydrating process. Once the guitar is stabilized, we repair any cracks in the fretboard or bridge, file sharp fret ends smooth, level any uneven frets, and finish with all the services in the **Refresh** package. (Guitars with additional wood cracks will incur further charges.)

\$200

Available for all Taylor guitar models

Expression System Options

Expression System UPGRADE

Includes Refresh package.

Upgrade your AA battery-powered Expression System to our latest version, powered by a 9v battery.

Benefits include:

- > Double the battery life (about 40-plus hours)
- > Our patented fused string ground safely protects you from electric shock and helps quiet grounding problems when plugging into an improperly grounded system
- > An LED battery indicator light on the preamp lets you know your battery is good
- > Separate on/off switches on the preamp for each dynamic top sensor give you more tonal control and variety

\$300

Expression System INSTALL

Includes Refresh package.

Looking to outfit your Taylor acoustic with electronics? Our proprietary Taylor Expression System pickup/preamp earned the highest honor in the pro audio industry, the Technical Excellence & Creativity (TEC) Award, in the category of musical instrument technology. Join the thousands of players who have had the ES electronics installed in their favorite Taylor acoustic model or retrofitted to replace a non-ES pickup.

Our electronics experts will perform a precision installation of the 9v ES pickup in your guitar and follow up with the Refresh package.

\$500

Available for all Acoustic models
300 Series and higher

Bone Upgrade

Add a bone nut and wave-compensated bone saddle upgrade to any acoustic service package for \$100.

TaylorWare

Many TaylorWare clothing items and accessories can fit in the spare space within the guitar shipping carton. Add them to your service order and avoid extra shipping charges!
